VAIBHAV SHUKLA

Data Analyst

+91 6387162214 | vaibhav6078@gmail.com | Lucknow, Uttar Pradesh, India | GATE 2025 Qualified (Score: 408)

PROFESSIONAL SUMMARY

Motivated and detail-oriented Data Analyst and Fraud Analyst with a strong foundation in statistics, data visualization, and analytical tools including Excel, SQL, and Python. Experienced in data cleaning, predictive modeling, and translating complex datasets into actionable business insights. Published researcher in IoT-based predictive analytics with hands-on project experience in software development. Adept at fraud detection, pattern recognition, and data storytelling. Eager to contribute to a data-driven organization and grow in an analytical role.

TECHNICAL SKILLS

Data Analysis & Visualization: Microsoft Excel (Pivot Tables, VLOOKUP, Dashboards), Power BI, Tableau, Google Data Studio, Google Sheets

Programming Languages: Python (Pandas, NumPy, Matplotlib, Scikit-learn), R, SQL

Database & Querying: SQL (Joins, Subqueries, Aggregations), MySQL, Database Management

Data Processing: Data Cleaning, Data Preprocessing, Handling Missing Data, Outlier Detection, Data Formatting

Statistics & Analytics: Statistics & Probability, Predictive Analytics, Machine Learning, Fraud Detection & Analysis

Web & Software Development: HTML, CSS, JavaScript, Python (Socket Programming), Swift 5, IoT Systems

Tools & Platforms: LeetCode (300+ problems solved), HackerRank, Coursera, Coding Ninjas, Intel APIs

WORK EXPERIENCE

Research Author / Data Analyst Intern | IJCRT (International Journal of Creative Research Thoughts) *2025*

- Conducted in-depth research on predictive analytics and machine learning techniques for IoT-enabled smart grid management.
- Applied real-time sensor data processing to forecast energy consumption patterns and optimize grid performance.
- Built fault detection models using predictive modeling approaches, achieving 9% plagiarism score (below industry threshold).
- Research paper accepted and published in IJCRT (Paper ID: IJCRT-282636).

Web Designer (Internship) | Skill Vertex *2023*

- Developed a fully responsive personal portfolio website using HTML, CSS, and JavaScript.
- Implemented a functional contact form and designed a smooth scrolling UI to enhance user experience.
- Collaborated with the team on verifying and deploying software systems.

AI Training Freelancer | Outlier AI *2023 – 2024*

- Trained and evaluated AI models as a freelance contributor to improve response accuracy and data quality.
- Reviewed, annotated, and quality-checked AI-generated outputs to support model improvement pipelines.

PROJECTS

Discord Chatbot / Real-Time Chat Application | University Project | Python, Socket Programming *2023*

- Designed and developed a terminal-based real-time multi-user chat application using client-server architecture.
- Integrated Discord developer support to enable multi-user connectivity and message broadcasting.
- Implemented socket programming for low-latency, bidirectional communication between clients.

RESEARCH & PUBLICATIONS

Predictive Analytics for IoT-Based Smart Grid Management | IJCRT.ORG | Paper ID: IJCRT-282636 *2025*

- Leveraged ML algorithms to forecast energy consumption and optimize IoT-enabled smart grid decision-making.
- Improved fault detection accuracy using real-time predictive models and sensor data pipelines.
- Published in International Journal of Creative Research Thoughts (IJCRT) — Plagiarism: 9%.

EDUCATION

Bachelor of Engineering (B.E.) – Computer Science & Engineering | Chandigarh University, Punjab *2021 – 2025*

Class XII – Science (Physics, Chemistry & Mathematics) | Lucknow Public School, Lucknow *2020 – 2021*

CERTIFICATIONS & COURSES

- Python Programming – Coursera
- Web Development Bootcamp – Udemy
- Data Structures & Algorithms – Coding Ninjas
- Swift 5 Language (iOS Development) – Coursera
- Intel APIs Learning – IIT Roorkee Workshop 2022
- Introduction to Internet of Things (IoT) – NPTEL (Credit-Based Certification)

AWARDS & ACHIEVEMENTS

- Top 5% Ranking – Hackathon at IIT Roorkee (Competitive national-level tech event)
- GATE 2025 Qualified – Score: 408 (Graduate Aptitude Test in Engineering)
- Solved 300+ Problems on LeetCode and HackerRank (Data Structures & Algorithms)
- Smart India Hackathon 2023 – Participant (National-level government innovation challenge)
- Inter-Department Basketball 2024 – Participant (Demonstrates teamwork and physical fitness)

CORE COMPETENCIES

Problem Solving • Attention to Detail • Critical Thinking • Communication & Data Storytelling • Team Collaboration • Time Management • Fraud Analysis • Analytical Reasoning
